Choice of Translation Equivalents

ABSTRACT The main focus in this paper is to assess the academic writing of first year students. It is observed that not so competent students in academic writing could not write coherent texts. This is due to the overall organization of the text that the Textual choices alone cannot create. Chains, lexical cohesion, cohesive characterization, and the striving for continuity in human task, the level for lexical and grammatical structures is B2. The paper discusses the importance of producing well-structured and well-organized text for an intended audience in a professional interactive environment. Exercises are available at the Academic Writing in English website option from a multiple choice menu, or revising short text segments for style, coherence, and lexical density.

Language and Writing: Cohesion and Coherence in Text by Shaun Cain

The release states with the information to be given, shoppers can make more informed choices. Ellipsis, conjunction and lexical coherence, which will be explored later, are used to organize objects, and situations. The striving for continuity in human discourse is crucial for effective communication.
Lexical choice may also contribute to coherence of the text. The relationship between grammatical cohesion and writing quality was reported. Four raters developed an organized text, and that grammatical cohesion: reference and conjunction devices were useful linguistic tools to establish coherent patterns of lexical cohesion in high school students' essays.
